Product Designer with UX Research Expertise

[Work Portfolio](#) | [Email](#) | [LinkedIn Profile](#) | 📍Göttingen, Germany | 📞+49 152 1234 3001

SUMMARY

Product Designer and UX Researcher with 8+ years of experience designing data-informed digital products across B2B SaaS, e-commerce, and enterprise platforms. Experienced in leading the full design process, from user research and usability testing to interaction design and design systems, while collaborating with cross-functional teams to deliver measurable outcomes. MSc in UX Design & Business (PFH Göttingen, 2024), with thesis and project work centred on AI-powered interfaces, sustainability metrics, and accessible conversational design for healthcare.

CORE SKILLS

Design: Figma · FigJam · Adobe XD · Wireframing · Prototyping · Design Systems

UX Research: User Interviews · Survey Design · Usability Testing · Journey Mapping · Heuristic Evaluation · Research Synthesis

Analytics & Data: UX Metrics · Google Analytics · Hotjar · A/B Testing · Statistical Analysis · Python · SQL · Excel

Collaboration: Miro · Jira · Notion

PROFESSIONAL EXPERIENCE

Product Designer — Ramboll — Dec 2020 – Apr 2023

- Built Ramboll's first design system with reusable components, design tokens, and documentation, reducing developer handoff time by 25%.
- Designed end-to-end e-commerce platform for Rehub (circular economy marketplace), covering product pages, filtering, checkout, and material reservation flows, improving task success rate by 20%.
- Redesigned FuelSave (maritime analytics B2B SaaS) with improved data visualisation and information architecture, increasing user efficiency by 30%.
- Led user-centred design for RMMS maintenance system through research and iterative usability testing, driving a 35% workflow efficiency gain.
- Facilitated cross-functional workshops and journey mapping sessions to align product decisions with business goals.

UI/UX Designer — Kellton Tech — Aug 2018 – Dec 2020

- Designed an end-to-end e-commerce experience for Durex India with mobile-first product pages and optimised checkout. Ran A/B testing to validate design decisions, increasing conversion by 20%.
- Created UI/UX for Akash Institute educational platform (web and mobile), improving feature accessibility by 30% through iterative testing and close developer collaboration.
- Led design reviews and stakeholder workshops to align product decisions with business and technical constraints.

UI/UX Designer — Asergis Group — Mar 2018 – Aug 2018

- Restructured content layout and visual hierarchy for cloud services product website, improving comprehension of offerings.
- Designed complete brand identity and website for The Thirsty Group restaurant chain: logo, landing page, and all key sections.

UI / Graphic Designer — Vinove Software & Services — Dec 2014 – Feb 2018

- Designed visual and digital assets for in-house product Invoicera: banners, emailers, animated banners, and infographics.
- Created wireframes, UI designs, and prototypes for 20+ client projects across healthcare, e-commerce, food, and real estate.

SELECTED UX CASE STUDIES

1. AI-Powered Dementia Screening App: UX Design & Research

Master's Final Project, PFH Göttingen | Mar 2024 – May 2024

Methods: Competitive analysis (9 apps). Expert evaluation with medical professionals. Conversational AI interface design for elderly users

Outcome: Designed an accessible conversational AI interface using persuasive dialogue patterns. Expert evaluation achieved 85% professional approval.

2. SpeechAlyzer: Usability & UX Evaluation

Master's Research Project, PFH Göttingen | Dec 2023 – Jan 2024

Methods: Semi-structured interviews · Think-aloud technique · Observation (n=9)

Outcome: Identified usability gaps in results presentation and delivered actionable design recommendations improving user satisfaction.

3. Master's Thesis: Sustainable Digital Product Design Strategy

PFH Göttingen | Jul 2024 – Sep 2024

Methods: Qualitative case analysis (Google, Apple, Meta, Tesla) · Quantitative user survey (n=51) · Digital nudge impact assessment

Outcome: Developed the Digital Product Sustainability Metrics (DPSM) framework to help product teams assess environmental and social impacts throughout product development. Validated against GRI, SASB, and ISO 14001 standards.

Full thesis available in my portfolio.
